ANNEXURE – I**Minutes of the 2nd meeting of the Expert Committee under the Chairpersonship of Dr. (Ms.) Shalini Chawla, Professor, Maulana Azad Medical College (MAMC), New Delhi On Minor Changes in Formulations of Pesticides**

A meeting of the Expert Committee on Minor Changes in Formulations of Pesticides, constituted by the Registration Committee in its 346th meeting, was held on September 18, 2014 in the LBS Building, IARI, Pusa, New Delhi at 11.00 hours under the Chairpersonship of Dr. Shalini Chawla, Professor, Maulana Azad Medical College (MAMC), New Delhi. Following members participated in the meeting:-

| 1. Dr. (Ms.) Shalini Chawla, Prof, MAMC, New Delhi |Chairperson |
| 2. Dr. Sushil K. Khurana, Consultant (Path), CIB&RC |Member |

| 5. Dr. V.K. Singh, Assistant Director (Ento.), CIB&RC |Member |
| 6. Mr. D. Bhattacharya, Dy. Director, CIB&RC |Member-Secretary. |

Major associations of Pesticide Industry were also invited. A list of participants is annexed.

At the outset, the Chairperson welcomed the members and desired that the presentations be made by the Member-Secretary. Thereafter, the associations be invited to make the presentations, followed by discussion. Accordingly, the Member-Secretary made a presentation on the Minor Changes in Formulations of Pesticides, explaining the concept of minor changes, its global status and conditions under which it would be applicable. This followed by a presentation by Dr. Roland Born of CropLife International on “Principles of Minor Change Regulation: Global Perspective and Proposal for a Regulatory Guideline in India” on behalf of the Pesticide Industry.

He explained that the production and supply of plant protection products is very complex, and there are many reasons which would require a change to a formulation. This could be improved technical performance (quality related), improved classification (safety related), withdrawal of co-formulants (sustainability related), changes of chemical identifiers (updating related), administrative corrections (data quality related) and new formulation sites related (product security based). He further explained that FAO provides a harmonized guideline for Quality Control and Management of good quality of formulated products, considering type of formulation according to catalogue, active substance content and tolerances, limits for relevant impurities, limits for physical and applicability defining the quality and limits after storage for good quality

product available on the market. He emphasized that FAO doesn't pay attention to the composition of a formulated product as FAO is not a Regulatory Agency as a result of which no recommendation exist for Change of Composition of formulated Products.

He informed that the Crop Protection Industry recognizes that there still does not exist a globally harmonized regulatory approach to Minor Changes of Formulations. However, CropLife has published a Technical Monograph No 19 (revised 2012) focused on "Minor Changes" as changes of Formulants and/or of their concentrations without covering other changes. It is the objective to provide for an accelerated approval process by regulatory authorities using the "Minor Changes procedure". With the help of slides he explained the general guideline as under:-

General requirements of the formulation:

- Same function, same formulation type, same/better hazard classification.
- Environmental & biological properties are unchanged or improved.
- Technical performance not adversely affected.
- Dose, concentration & frequency of application is unchanged.

Changes of co-formulants:

- Co-formulant must have the same purpose/function
- Must belong to same chemical class or have a similar identity.
- Co-formulants must meet criteria of acceptability
 - No negative impact on the classification & toxicity profiles of end use products.
 - No negative effects on target crops.
 - No harmful effect on human, animal health or on environment.
- Formulant amount not changed by more than defined amount depending on initial concentration.

He explained the permitted tolerances of co-formulants according to CropLife Monograph as derived from EU regulation 1272/2008 on Classification, Labelling and Packaging (CLP). He also explained US-EPA, Australian and Canadian Regulations too on the subject in brief. He proposed a mechanism whereby certain minor changes, as per EU SANCO, to the already registered products could be made through the endorsement process in India. The proposed criteria and procedures are

considered appropriate to meet Health and Environment Protection goals as per Indian concerns and adequate to provide a clear and transparent framework for Industry. He also explained the categories of changes as under:-

- (i) Non-significant Minor Change: wherein there is no significant impact on properties of the formulation, thereby not requiring any studies.
- (ii) Significant Minor Change: wherein minor impact on properties of formulation is there, requiring targeted studies.
- (iii) Major Change: wherein major impact on properties of formulation is bound to be there, requiring altogether a new registration dossier.

He emphasized that the original should be permitted to seek the change as they submitted the original data at the time of original registration of the product.

The presentation was followed by a discussion, wherein the domestic manufacturers raised the issue that minor change is related to a registration and not to the original registrant. Consequently, any registrant can seek a change under this facility, if a registrant has the capability to do so. The members were also of the opinion that once the concept of minor changes in formulations is accepted and allowed, it would not be possible to stop any registrant from seeking it. If stopped, there would be litigations. If not stopped, this might result into such number of compositions of the same insecticide as the number of its registrants. This situation would throw the concept of 'the original' and 'me too' registration of the same insecticide on the same conditions to the wind.

The Expert Committee, therefore, decided that all Associations of Pesticide Industry may give their opinion on the issue, sit together to arrive at a consensus on it and submit a commonly accepted proposal for consideration of the Expert Committee. CropLife India would co-ordinate the exercise. Associations sought a minimum of two months time to complete this exercise. However, the Chairperson agreed to the deadline of October 31, 2014. It was proposed that the minutes of this meeting would be placed before the Registration Committee in its forthcoming meeting on September 30, 2014 for information and display on the website of the Sectt. of CIB & RC as a part of minutes for notice of all the members of pesticide Industry.

The Expert Committee also decided to co-opt Dr. P.K. Patanjali, IPFT, Gurgaon as a member of the Expert Committee.

The meeting ended with a vote of thanks to the Chair.
