

MINUTES OF 355th MEETING OF REGISTRATION COMMITTEE (RC) HELD ON 29.04.2015 IN COMMITTEE ROOM NO. 1 GROUND FLOOR, ICAR, KRISHI BHAWAN, NEW DELHI.

The 355th Meeting of Registration Committee (RC) was held under the Chairmanship of Dr. J.S. Sandhu, Deputy Director General (Crops Science) & Chairman, RC on 29.04.2015 at 2.30 hrs. in the Committee Room No. 1, Ground Floor, ICAR, Krishi Bhawan, New Delhi. Dr. S. N. Sushil, Plant Protection Adviser, Dr. P. K. Chakraborty, ADG (PP), ICAR, Dr. Shalini Chawla, Professor, Maulana Azad Medical College, Dr. K.K. Sharma, Project Coordinator, Dr. Rohit Misra, Assistant Industrial Adviser, M/o Chemicals & Fertilizers, representative of DCGI Smt. Swati Srivastava, Asst. Drugs Controller (I), Sh. Subodh K. Juikar, Deputy Director, IIP, New Delhi and Dr. B.S. Phogat, Addl. Plant Protection Adviser & Secretary (CIB&RC) attended the meeting. Following officers from the Secretariat of CIB&RC were also present to assist the Committee:-

1. Dr. Sushil K. Khurana, Consultant (Path.)
2. Dr. (Mrs.) Sandhya Kulshrestha, Consultant (Pharma)
3. Dr. (Mrs.) Sarita Bhalla, Spl. Grade-I
4. Dr. Harish Chandra, JD(E)
5. Mr. Hariom Miglani, Sr. LO
6. Mr. Dipankar Bhattacharya, DD(Chem)
7. Dr. A.N. Singh, DD (WS)
8. Mrs. Kamlesh Miglani, DD(C)
9. Dr. T.A. Usmani, DD (PP)
10. Mr. Subhash Chand, DD (Chem)
11. Dr. (Mrs.) Vasudha Gautam, AD (Ento)
12. Mr. Abhishek, AD (Chem)
13. Mr. Niraj Kulshrestha, Law Officer

At the outset, the Chairman welcomed the Members and requested APPA & Secretary (CIB&RC) to take up the agenda, item-wise, for discussions.

Each issue was deliberated in detail and following decisions were taken by the RC:-

<u>Agenda item No.</u>	<u>Particulars of Agenda</u>
1.0	Confirmation of minutes of the 354 meeting of the Registration Committee
	As no comments were received, the minutes of the 354 th meeting were confirmed.
2.0	Follow up action on the decisions taken by the Registration Committee in its 354 meeting.
	The Committee noted the action taken by the Secretariat with satisfaction.
2.1	Applications pending under various sub-sections of the Insecticides Act, 1968

	Noted with satisfaction.
2.2	Presentation M/s Indian Paint Association regarding for proposed guidelines
	The Committee agreed to the request of Indian Paint Association to make presentation on guidelines in the next meeting of Registration Committee.
2.3	Presentation M/s Syngenta India Ltd., for registration of <i>Emamectin benzoate Technical (95% min. w/w) u/s 9(3) of the IA, 1968.</i>
	The Committee agreed to the requests of M/s Syngenta India Ltd., to make presentation in the next meeting of Registration Committee.
3.0	<u>Government Business</u>
3.1	Follow up action of Dr. C. D. Mayee committee Recommendations on <i>Phendimethalin.</i>
	The committee deliberated the Agenda in detail and decided that the report be refer to four fisheries experts viz. 1. Dr. A.P. Sharma, Director, Central Inland Fisheries Research Institute (CIFRI), Barrackpore, 2. Dr. P. Jayasankar, Director, Central Institute of Freshwater Aquaculture (CIFA), Bhubneswar, 3...Dr. J.K. Jena, Director, National Bureau of Fish Genetic Resources (NBFGR), Lucknow & 4. Dr. K. Pani Prasad, Pr. Scientist, Aquatic Division, Central Institute of Fisheries Education (CIFE), Mumbai for their comments. The Committee further decided that report may also be sent to Dr. K.K. Sharma, Network Coordinator, All India Network Project on Pesticide Residues (AINPPR).
3.2	Follow-up action on the recommendations of C. D. Mayee Committee regarding <i>Mancozeb.</i>
	The committee deliberated the Agenda in detail and decided that DAC may be requested to write a letter along with approved protocols to the identified Medical Colleges for conducting the proposed studies. Committee further decided that the studies be completed within one year.
3.3	The protocol for studies on effect of <i>Neonectonids</i> on honey bees.
	The committee deliberated the comments of stake holders viz. CLI, PMFAI & CCFI in detail and approved the protocol after taking opinion of the project coordinator of honey bees (Dr. Thakur), who also attended the meeting as a special invitee. Copy of protocol annexed at Annexure- I.
4.0	<u>Export Cases</u>
4.1	List under section 9(3) Export applications
	Approved as proposed in Annexure -4.1.1, 4.1.2, 4.1.3 & 4.1.4 of Agenda with minor correction at S. No. 17, 18, 27 and 28 of Annexure 4.1.1. The cases at S. No. 13, 14 & 22 of Annexure 4.1.1 are approved subject to valid chemexil certificates.

4.2	Consideration of an application of M/s Rallis India Ltd., for grant of registration for indigenous manufacture of <i>Flumioxazin Technical (TC) 95% w/w min u/s 9(3) Export.</i>
	Approved
4.3	Considration of an application of M/s Willowood Chemicals Pvt. Ltd., , for grant of registration for indigenous manufacture of <i>Remsulfuron Technical (TC) 96% w/w min u/s 9(3) Export.</i>
	Approved
4.4	Considration of an application of M/s Tagros Chemicals India Ltd., for grant of registration for indigenous manufacture of <i>Sulfentrazone 500 g/l SC s u/s 9(3) Export.</i>
	Approved
4.5	Consideration of an application of M/s Dow Agro Science India Pvt. Ltd., for grant of registration for indigenous manufacture of <i>Tricyclazole 18% + Tebuconazole 14.4% SC u/s 9(3) Export.</i>
	Approved
5.0	<u>9(3B) Cases</u>
5.1	Consideration of application of M/s Allwin Industries , Indore for grant of registration for indigenous Biopesticide manufacturing of <i>Pseudomonas fluorescens 1.00% WP u/s 9(3B).</i>
	The committee observed that the comments from Plant Pathology expert not included in the Agenda. The comments of Plant Pathology expert were circulated in the meeting for inclusion on the relevant page of the Agenda. Accordingly the case is complete and approved with commercialization for a period of two years.
5.2	Consideration of application of M/s Allwin Industries , Indore for grant of registration for indigenous Biopesticide manufacturing of <i>Trichoderma viride 1.50% WP u/s 9(3B)</i>
	The committee observed that the comments from Plant Pathology expert not included in the Agenda. The comments of Plant Pathology expert were circulated in the meeting for inclusion on the relevant page of the Agenda. Accordingly the case is complete and approved with commercialization for a period of two years.
5.3	Consideration of application of M/s Allwin Industries , Indore for grant of registration for indigenous Bio-pesticide manufacturing of <i>Trichoderma harzianum 1.0% WP u/s 9(3B)</i>
	The committee observed that the comments from Plant Pathology expert not included in the Agenda. The comments of Plant Pathology expert were circulated in the meeting for inclusion on the relevant page of the Agenda. Accordingly the case is complete and approved with commercialization for a period of two years.

5.4	Consideration of application of M/s Biotech International Ltd., New Delhi for grant of registration for indigenous Biopesticide manufacturing of <i>Trichoderma viride</i> 1.50% WP u/s 9(3B).
	The committee observed that the comments from Plant Pathology expert not included in the Agenda. The comments of Plant Pathology expert were circulated in the meeting for inclusion on the relevant page of the Agenda. Accordingly the case is complete and approved with commercialization for a period of two years.
5.5	Consideration of application of M/s Gujarat Lifescience (P) Ltd., Bnaroda for grant of registration for indigenous Biopesticide manufacturing of <i>Trichoderma viride</i> 1.50% WP u/s 9(3B).
	The committee observed that the comments from Plant Pathology expert not included in the Agenda. The comments of Plant Pathology expert were circulated in the meeting for inclusion on the relevant page of the Agenda. Accordingly the case is complete and approved with commercialization for a period of two years.
5.6	Request for M/s Greenfert Agro Research Centre Pvt. Ltd., for 3rd time extension of validity period of provisional certificate of registration of <i>Pseudomonas fluorescens</i> 0.5% WP for one year with commercialization.
	Approved with commercialization for a period of one year and no further extension shall be granted.
5.7	Request for M/s The Gramakarshaka Fertilizer Company Ltd., for 3rd time extension of validity period of provisional certificate of registration of <i>Pseudomonas fluorescens</i> 0.5% WP for one year with commercialization.
	Approved extension for a period of one year with commercialization.
5.8	Request for M/s SRT Agro Science Pvt. Ltd., for 3rd time extension of validity period of provisional certificate of registration of <i>Trichoderma viride</i> 1% WP for one year with commercialization.
	Approved extension for a period of one year with commercialization.
5.9	Request for M/s Greenfert Agro Research Centre Pvt. Ltd., for 3rd time extension of validity period of provisional certificate of registration of <i>Trichoderma viride</i> 1% WP for one year with commercialization.
	Approved extension for a period of one year with commercialization.
5.10	Request for M/s Viswa Mithra Bio Agro (P) Ltd., Guntur for 2nd time extension of validity period of provisional certificate of registration of <i>Trichoderma harzianum</i> 1% WP for one year with commercialization.
	Approved with commercialization for a period of one year.
5.11	Request for M/s Aviral Biotech & Fertilizer Pvt. Ltd., for 2nd time extension of validity period of provisional certificate of registration of <i>Pseudomonas fluorescens</i> 0.5% WP for one year with commercialization.
	Approved extension for a period of one year with commercialization.
5.12	Request for M/s Devi Biotech Pvt. Ltd., for 3rd time extension of validity period of provisional certificate of registration of <i>Trichoderma viride</i> 1% WP for one year with commercialization.

	Approved extension for a period of one year with commercialization.		
5.13	Request for M/s Safe Crop Science Pvt. Ltd., for 1st time extension of validity period of provisional certificate of registration of <i>Trichoderma viride</i> 1% WP for one year with commercialization.		
	Approved extension for a period of one year with commercialization.		
5.14	Request for M/s Shri Datta Gro-Tech & Equipment, Nagpur for 1st time extension of validity period of provisional certificate of registration of <i>Trichoderma viride</i> 1% WP for one year with commercialization.		
	Approved extension for a period of one year with commercialization.		
5.15	Request for M/s Aviral Bio-tech & Fertilizers Pvt. Ltd., for 2nd time extension of validity period of provisional certificate of registration of <i>Trichoderma viride</i> 1% WP for one year with commercialization.		
	Approved extension for a period of one year with commercialization.		
5.16	Request for M/s Antecedent Pabulum Inc. Bhatinda, for 3rd time extension of validity period of provisional certificate of registration of <i>Beauveria bassiana</i> 1.15% WP with commercialization.		
	Approved extension for a period of one year with commercialization.		
5.17	Request for M/s Agro Biotech Research Centre, Kottayam for 3rd time extension of validity period of provisional certificate of registration of <i>Verticillium lecanii</i> 1.15% WP with commercialization.	-	-
	Approved extension for a period of one year with commercialization.		
5.18	Request for M/s SRT Agro Science Pvt. Ltd., Chhattrisgarh, for 3rd time extension of validity period of provisional certificate of registration of <i>Verticillium lecanii</i> 1.15% WP with commercialization.	-	-
	Approved extension for a period of one year with commercialization.		
5.19	Request for M/s SRT Agro Science Pvt. Ltd., C for 3rd time extension of validity period of provisional certificate of registration of <i>Beauveria bassiana</i> 1.15% WP with commercialization.	-	-
	Approved extension for a period of one year with commercialization.		
5.20	Request for M/s Ruchi Bio Chemicals, Mumbai, for 2nd time extension of validity period of provisional certificate of registration of <i>Bacillus thuringiensis</i> var. <i>kurstaki</i> 0.05% WP with commercialization.	-	-
	Approved extension for a period of one year with commercialization.		
5.21	Request for M/s Shree Shiva Bio-Tech, Tamil Nadu , for 1st time extension of validity period of provisional certificate of registration of <i>Trichoderma</i>	-	-

	<i>viride</i> 1.0% AS with commercialization.
	Approved extension for a period of one year with commercialization.
5.22	Request for M/s Adiraj Agro Industries, Pune, for 1st time extension of validity period of provisional certificate of registration of <i>Verticillium lecanii</i> 1.15% WP with commercialization.
	Approved extension for a period of one year with commercialization.
5.23	Request for M/s Microplex Biotech & Agrochem Pvt. Ltd., for 2nd time extension of validity period of provisional certificate of registration of <i>Metarhizium anisopliae</i> 1.15% WP with commercialization.
	Approved extension for a period of one year with commercialization.
5.24	Consideration of application of M/s Department of Plant Pathology, Assam Agriculture University, Assam for grant of registration for indigenous Bio-pesticide manufacturing of <i>Trichoderma viride</i> 1.50% WP u/s 9(3B).
	Approved with commercialization
5.25	Consideration of application of M/s Antecedent Pabulum Inc. Bhatinda for grant of registration for indigenous Bio-pesticide manufacturing of <i>Trichoderma viride</i> 1.50% WP u/s 9(3B).
	Approved with commercialization
5.26	Consideration of application of M/s Oshnic Crop Science Ltd., for grant of registration for indigenous Bio-pesticide manufacturing of <i>Trichoderma viride</i> 1.50% WP u/s 9(3B).
	Approved with commercialization
5.27	Consideration of application of M/s Tagros Chemicals India Ltd., for grant of registration for indigenous Bio-pesticide manufacturing of <i>Trichoderma viride</i> 1.50% WP u/s 9(3B).
	Approved with commercialization
5.28	Consideration of application of M/s Krishi Vigyan Kendra, Amarvati for grant of registration for indigenous Bio-pesticide manufacturing of <i>Trichoderma viride</i> 1.50% WP u/s 9(3B).
	Approved with commercialization
5.29	Consideration of application of M/s Rohini Bio-Agents, Karnataka for grant of registration for indigenous Bio-pesticide manufacturing of <i>Trichoderma viride</i> 1.50% WP u/s 9(3B).
	Approved with commercialization
5.30	Consideration of application of M/s East Cost Biotech Project, Bhubaneswar for grant of registration for indigenous Bio-pesticide manufacturing of <i>Trichoderma viride</i> 1.00% WP u/s 9(3B).
	Approved with commercialization
5.31	Consideration of application of M/s Sun Plant Agro Products Pvt. Ltd., Katihar for grant of registration for indigenous Bio-pesticide manufacturing

	of <i>Trichoderma viride</i> 1.50% WP u/s 9(3B).
	Approved with commercialization
5.32	Consideration of application of M/s Surya Bio Products for grant of registration for indigenous Bio-pesticide manufacturing of <i>Trichoderma viride</i> 1.50% WP u/s 9(3B).
	Approved with commercialization
6.0	<u>9(3) CASES</u>
6.1	Consideration of an application of M/s Dhanuka Agritech Ltd , New Delhi for grant of registration for indigenous manufacture of <i>Kasugamycin</i> 5% + <i>Copper Oxychloride</i> 45% WP (w/w) U/s 9(3).
	Approved subject to MRL fixation.
6.2	Consideration of an application of M/s Nagarjuna Agrochem Ltd., Hyderabad for Extension of validity period of the Registration Certificate of <i>Pyrazosulfuron ethyl</i> 70% WDG u/s 9(3).
	Approved extension of certificate of registration under Section 9(3) as FIup to 17 th March, 2018 from Nissan Chemical Industries Ltd., Japan.
6.3	Consideration of an application of M/s P I Industries Ltd., for grant of registration for import of <i>Thiocyclam hydrogen oxalate</i> Technical under section 9(3).
	The Agenda was deliberated in detail and committee decided to ask the applicant for making presentation in the next meeting of RC specifically w.r.t. source of import & manufacturing site and comparison of five batch analysis from two sources i.e. Japan & China, with background of data generation and its applicability. In the mean time ,verification of source (M/s Suzhou Link Hi-Tech Co. Ltd., China) may also got done from ICAMA, China.
6.4	Consideration of an application of M/s P I Industries Ltd., Gurgaon for grant of registration for indigenous manufacture of <i>Thiocyclam Hydrogen oxalate</i> 50% SP (w/w) under section 9(3)
	Deferred in view of the decision in Agenda Item No. 6.3
6.5	Consideration of an application of M/s P I Industries Ltd., for grant of registration for indigenous manufacture of <i>Thiocyclam hydrogen oxalate</i> 4% G (w/w) under section 9(3).
	Deferred in view of the decision in Agenda Item No. 6.3
6.6	Consideration of an application of M/s Indofil Industries Ltd., Mumbai for grant of registration for import of <i>Cartap hydrochloride</i> Technical 98% min. w/w under section 9(3).
	Approved with validity up to December, 7, 2019. of source (M/s Yueyang Anda Chemicals Ltd., and supplied by M/s Beta Chemicals Ltd., China)

7.0	<u>9(4) CASES</u>
7.1	Consideration of application of M/s HPM Chemicals & Fertilizers Ltd., New Delhi for grant of registration for indigenous manufacture of <i>Butachlor Technical</i> under section 9(4).
	Approved
7.2	Consideration of application of M/s Cheminova India Ltd., Mumbai for grant of registration for indigenous manufacture of <i>Pretilachlor Technical</i> under section 9(4).
	Approved
7.3	Consideration of application of M/s Cheminova India Ltd., Mumbai for grant of registration for indigenous manufacture of <i>Sulfosulfuron Technical</i> under section 9(4).
	Approved
7.4	Consideration of application of M/s Meghmani Organics Ltd., for grant of registration for indigenous manufacture of <i>Bifenthrin Technical</i> under section 9(4).
	Approved
7.5	Consideration of application of M/s Cheminova India Ltd., Mumbai for grant of registration for indigenous manufacture of <i>Fenpyroximate Technical</i> under section 9(4).
	Approved
7.6	Consideration of application of M/s Pest Control (India) Ltd., Thane for grant of registration for indigenous manufacture of <i>Bromodiolone Technical</i> under section 9(4).
	Approved
7.7	Consideration of application of M/s Best Crop Science Pvt. Ltd., New Delhi for grant of registration for indigenous manufacture of <i>Difenthiuron Technical</i> under section 9(4).
	Approved
8.0	<u>ENDORSEMENT CASES</u>
8.1	Request from Dhanuka Agritech Ltd., Delhi for the endorsement of additional packing of bi-laminated pouch in HDPE woven sacks for transport packing of capacity 25 kg for <i>Cartap hydrochloride 4% GR</i>.
	Approved
8.2	Request from E. I. D Parry (India) Ltd., for the endorsement of 50 ml packing in HDPE container for <i>Azadirachtin 5% EC</i>.
	Approved
8.3	Request from M/s Karnataka Antibiotics and Pharmaceuticals Ltd., for the endorsement of LDPE liner polycoated pouch of 500 gm capacity for <i>Streptomycin sulphate + Tetracycline hydrochloride</i>.

	Approved
8.4	Request from M/s UPL Ltd., Mumbai for the endorsement of Additional packing in tri-laminated pouch of capacity 40 gm, 80 gm, 120 gm, 160 gm, 200 gm for <i>Pyrazosulfuron ethyl 10% WP</i>
	Approved
8.5	Application for label expansion of Ametoctradin 27 % + <i>Dimethomorph 20.27 % SC</i> on cucumber & Potato crop submitted by M/s BASF India Ltd., Mumbai
	Approved subject to fixation of MRL
8.6	Endorsement for transfer of certificates of registration from M/s Sebro Organics Gujarat ltd., to M/s coromandel International Ltd., Secunderabad.
	Approved
9.0	<u>MISCELLANEOUS ITEMS</u>
9.1	Request of M/s Godrej Agrovet Ltd., for import of sample quantity of A253 <i>Technical</i> for data generation.
	Approved
9.2	Request of M/s Godrej Agrovet Ltd., for import of sample quantity of A253 <i>standard</i> reference for data generation.
	Approved
9.3	Request of M/s Godrej Agrovet Ltd., for import of sample quantity of A253 <i>10% EC</i> for data generation.
	Approved
9.4	Addition of Methyl Violet Dye in the formulation of <i>Carboxin 37.5% + Thiram 37.5% WS</i>.
	The Committee was deliberated the agenda in detail and decided that the registration application with revised chemical composition along with following data be submitted for registration of this product : <ol style="list-style-type: none"> 1. Chemistry - Complete shelf-life data with revised chemical composition. 2. Bio-efficacy – as such of germination data. 3. Toxicity – i) Acute oral rat, ii) acute dermal. 4. Packaging – i) Manner of packing, ii) Container Content Compatibility (CCC) Test. & iii) Complete Storage stabilities study.
9.5	Request of Sumitomo Chemical India Pvt. Ltd., to exempt study on post-marketing surveillance for health monitoring of inhabitants for <i>Cyphenothrin 5% EC</i>.
	Approved
9.6	Consideration of applications for enhancement of Shelf-life under section 9(4) of the Insecticides Act, 1968.

	Approved as per Annexure – II.
9.7	Consideration of closing of files under Bio-pesticide u/s 9(3) & 9(3B) and other category, pending for reply of deficiencies for more than 6 months.
	Approved.
9.8	Consideration of applications for extension of validity of certificates of registration of Bio-pesticides under section 9(3B).
	Approved.
9.9	Consideration of application for import permits for Boric Acid and other substances for non-insecticidal use.
	The committee deliberated the Agenda in detail and the decision is annexed at Annexure – III.
10.0	Online filling of application for registration under different categories
10.1	Summary of disposal of case including case being taken up for the approval of Registration Committee.
	The Committee approved the applications for grant of registration under Section 9 (4) FIM, which are complete as per guidelines and for which MRLs have been fixed/partially fixed and not required as proposed in Annexure-10.1.1 of the Agenda. Approval of all the applications is subject to submission of affidavits (Reference decision in Agenda Item No. 3.12 of 354 th RC) by the applicant as well as from the manufacturer of technical to the formulators, within 45 days of hosting of minutes which shall be subject to verification. In case, affidavit is not received within 45 days the application shall be closed after giving ten days final notice.
11.1	Consideration of proposal for permission to use of some insecticides against an invasive pest, South American Tomato Pin Worm (Tuta absoluta).
	The communication received from DAC vide letter No.,13035/28/2015-PP-I dated 20.04.2015 alongwith background note of PPA on the above issue was deliberated in the Registration Committee in detail. Keeping in view the National Exigency and alarming situation of the invasive pest i.e. South American Tomato Pin Worm (Tuta absoluta), the Committee decided to permit the use of for a period of two years provisionally for the pesticides viz. Cyantraniliprole 10.26% OD, Chlorantraniliprole 18.5% SC, Flubendiamide 20% WG, Indoxacarb 14.5 SC, Azadirachtin 1% & 5%, Imidacloprid 17.8% SL for controlling the above pest, to be used as per doses. dilution, time of application etc. as indicated in the label claim of these pesticides for tomato. The above recommendation of Registration Committee should be sent to DAC for concurrence before implementation. Committee further decided that a suitable communication be sent to DG, ICAR from DAC for generation of required data as per guidelines of

	RC (bioficacy persistence & residues) for regular expansion of Label claim of these pesticides in tomato crop.

Annexure – I

EVALUATING IMPACT OF NEONICOTINOIDS
ON POLLINATORS FINAL PROTOCOLS

**A PRELIMINARY PROJECT PROPOSAL
SUBMITTED TO DAC
MINISTRY OF AGRICULTURE**

**SUBMITTED BY
DR. R.K.THAKUR
MEMBER SECRETARY
COMMITTEE ON FINALIZATION OF PROTOCOLS**

ALL INDIA COORDINATED RESEARCH PROJECT

**(HONEY BEES AND POLLINATORS)
DEPARTMENT OF ENTOMOLOGY,
INDIAN AGRICULTURAL RESEARCH INSTITUTE
PUSA, NEW DELHI**

EVALUATING IMPACT OF NEONICOTINOIDS ON POLLINATORS

In recent years, insecticides belong to a chemical class, 'neonicotinoids' have been the fastest growing class of insecticides in modern crop protection, with widespread use against a broad spectrum of sucking pests. These chemicals target the nAChR which are more abundant in insects thus made them highly specific against insect than mammals. In India, these pesticides are approved for use against sucking pests infesting a number of agricultural/ horticultural crops including bee attractive crops like mustard, cucurbits, cotton, citrus and sunflower. Imidacloprid and thiamethoxam are approved on mustard and imidacloprid, thiacloprid, acetamiprid, thiamethoxam and clothianidin on cotton. Among these neonicotinoids, clothianidin, imidacloprid and thiamethoxam were categorized as highly toxic and acetamiprid and thiacloprid as moderately toxic to honey bees. Besides lethal effects, these insecticides also cause sub-lethal effects on useful beneficial fauna including honey bees like reduced feeding and locomotor activity in bumble bees, decision making in honey bees, thus endangering vital ecological services i.e. pollination provided by these beneficial insects. Since bees contribute towards 35 per cent of global crop production hence are quite important for sustainable agriculture. Based on these research findings and association of these insecticides in causing colony collapse disorder of honey bees (CCD), in Europe, recently European Commission (EC) issued a two year moratorium for the use of three neonicotinoids viz. clothianidin, imidacloprid and thiamethoxam for pest management on bee attractive crops. At the same time there is paucity of scientific data on the harmful effects of neonicotinoids on honey bees in India, therefore, this research proposal is formulated to study the effects of neonicotinoids applied on mustard and cotton on honey bees when applied for pest management under Indian conditions.

**IMPACTS OF NEONICOTINOIDS INSECTICIDES ON APIS AND NON APIS
POLLINATORS**

Under-estimation of the pivotal role of insect pollinators is a key constraint to the sustainability of contemporary agricultural practices. In agricultural ecosystem, many agricultural crops are dependent on insects for their pollination, and assisted pollination may have to be done when natural pollination is insufficient in order to reduce potential yield loss. About 80% of the world's flowering plant species are dedicated on animal pollination, mostly by insect (FAO, 2007). The worldwide economic value of the pollination services provided by insect pollinators in 2005 was estimated about €153 billion. The United Nations also reported on the economics of ecosystems and biodiversity that insect pollination was valued at £134 billion. Many plants have evolved intricate relationships with many insect pollinators, without which they would not reproduce and maintain their diversity. At the global level, the convention on bio- diversity has identified the importance of pollinators with the establishment of the International Initiative for the Conservation and Sustainable Use of Pollinators (International Pollinators Initiative-IPI) in 2000, facilitated and coordinated by FAO. Many ecosystems, including agro- ecosystem, depends upon pollinator diversity to maintain their biodiversity.

The whole world is suffering from decreasing of pollinators (both in abundance and diversity); its deficit directly thumps pollination service; pollination depletion affects agro- ecosystems crop productivity and their sustainability. Pollination is one of the most essential ecosystem services effectual for crop productivity and human livelihoods. Conservation and management of pollinators is still ignored in the agriculture development program by the policy makers. With the commercialization of agriculture, especially in developing countries, burning challenges are emerging to sustain their crop productivity. Amongst insects, undoubtedly honey bees are ultimate pollinators because they are active the whole year for pollination; do not hibernate, works longer periods daily than other pollinators, number of worker bees per colony is also higher than the other insects, dense hairs on the corbicula for carrying abundant pollens and their average foraging rate and meticulous handling of flowers are much advance than other pollinators. Bees are dominant pollinators in tropical region because their food sources are totally dependent upon flower. India Government has already passed food security bill which require more food grain to fulfilment of their commitment. India population proliferating day by day now rich about 125 crores and food requirement have positive correlation with population; therefore more food require for sustenance. India is a developing country where cultivated land has been exploiting for construction of new roads, industrialization, new colonization etc. therefore for fulfilment food security bill commitment only one way is remaining: enhance the productivity. Pollinators can play pivotal role to enhance the productivity which is expected to be a tool of 2nd green revolution.

Neonicotinoids embarked in Indian market during 1st decade of this century whereas it was available in the developed country mid of 1990s. Neonicotinoids are synthetic chemical insecticides their structure and mode of action is similar to Nicotine. European states have voted in favour of a proposal to restrict the use of pesticides linked to serious harm in bees. Europe will enforce the world's first continent-wide ban on widely used insecticides alleged to cause serious harm to bees. Although the vote by the 27 EU member states on whether to suspend the insect nerve agents was supported by 15 nations, but did not reach the required majority under voting rules. The commission proposed the suspension after the EFSA concluded that three neonicotinoids; Thiamethoxam, Clothianidin and Imidacloprid – posed an unacceptable risk to bees. The three will be banned from use for two years on flowering crops such as corn, oilseed rape and sunflowers, upon which bees feed.

OBJECTIVES OF THE PROJECT

- To quantify the impact of neonicotinoids on brooding behaviour and survival of honeybees.
- To access the impact of neonicotinoids on foraging behaviour of honey bees.
- To ascertain the insecticidal residue in honey.
- To determine the extent of contamination in pollen and nectar.
- To study the toxicity of neonicotinoids to honey bee (*A. mellifera*) foragers and brood.
- To study the effects of contaminated nectar and pollen on honey bee foragers and brood in semi field studies.
- Field studies on colony development.

USE OF NEONICOTINOIDS IN DIFFERENT CROPS

Active ingredient	Crop/ use	Pest
Imidacloprid	Cotton	Sucking pest like Jassids, aphids, mealybugs, thrips, white fly.

	Citrus	leaf miners, aphids and thrips.
Acetamiprid	Cotton	Sucking pest like Jassids, aphids, thrips, , white fly. leaf miners, aphids and thrips. Aphids
	Citrus

Clothianidin	Cotton	Jassids and White flies.

FLOWER AND SOWING TIME AT DIFFERENT PROPOSED CENTRES OF STUDY

Sr.No.	Centre Name	Crop name	Flowering time	Sowing time
1.	Nagaland	a. Mustard	December (3 rd week) to February (1 st week)	September (2 nd week) October (1 st week)
		b. Citrus	March (2 nd week) to April (2 nd week)	-
2.	Solan	a. Mustard	October to February	September to December
3.	Bhubneshwar	a. Mustard	November to January	October (Last week) to November (First week)
4.	Ludhiana	a. Mustard	Jan to February	Oct. 10-30
		c. Cotton	Mid- July to mid September	April-May 15

5.	Andhra Pradesh	a. Citrus	November, December, January, February, June, July	-
		b. Cotton	September, October, November, December	June, July, August
6.	Pantnagar	a. Mustard		<ul style="list-style-type: none"> • Five Acre Mustard Crop Sown on 26th Sept 2014. • Five Acres Mustard crop is to be sown on 5th October 2014. • Five Acres of Mustard Crop is to be sown on 15th October 2014. • Rest of the 10 Acres will be sown later, to be decided.

METHODOLOGY

- Sown crop have all the agronomical practices for proper vegetative growth before start of the flower, the crop will be covered by net to restrict the pollinators activity.
- The desire strength of bee colonies will be placed in the confined area with known number of foragers in different treatments.
- Thereafter at the time of blooming, the crop will be sprayed with molecules to be tested. Hive bees will be allowed to visit the treated crops.
- Foraging behaviour of bees will be observed and growth and development of bee will be observed.
- The growth and development of brood in incubator will observed at optimum temperature & humidity.

- The contaminated pollen grains collected and stored by foragers in the comb will be isolated in vials and send for residue analysis to the concerned laboratory.

FIRST YEAR PLAN OF WORK

- Mustard and cotton crop will be sown in a measured area.
- The crop covered with net to confine the bees in the sprayed area.
- Three frames colonies (small) will be placed in each treatments
- The specific doses of insecticides will be applied in the field
- Tunnel test on honey bees will also be conducted

SECOND YEAR PLAN OF WORK

- The selected mustard and cotton crop will be sown in a measured area.
- Honey bee colonies with 3 frames prepared & placed in each treatments before blooming.
- The entire crop area covered with net to confine the bees in the sprayed area.
- Some of the experiments may be conducted in farmers field.
- The specific doses of insecticides will be applied in the field
- All the protocols followed to observe the larval developments of honey bees in laboratory conditions.
- Semi field tests on larval development of honey bees will be carried out
- Tunnel test on honey bees will also be conducted.

Field studies will be conducted in the cases showing relevance of concern.

EXPERIMENTAL DESIGN PER CROPS

- Treatments
- Molecule-1 x 3 replications =3
- Molecule-2 x 3 replications =3
- Molecule-3 x 3 replications =3
- Molecule-4 x 3 replications =3
- Molecule-5 x 3 replications =3
- Molecule-6 x 3 replications =3
- Total number of plots 18

ANTICIPATED OUTCOMES

- The impact of various neonicotinoids used in mustard, Cotton and Citrus crop could be quantified.
- Growth & development of bee brood with the exposure of contaminated pollen can be measured.
- Impact of neonicotinoids on foraging behaviour of bees can be determined.
- Residual effect of neonicotinoids in honey can be measured.
- On the basis of data generated through the various scientific trails can be used to seek legitimate action for the sake of sustainable agriculture.

PROTOCOLS IN BRIEF

Laboratory tests

Oral and contact toxicity of test compounds (Neonicotinoids) to larvae will be assessed in the laboratory. They would be exposed to different doses of the compound by way of feeding or topical application. Mortality values are used to provide a regression line and LD50.

The experimental unit consists of an individual cell containing a larva. A minimum of twelve larvae from each of three colonies will be allocated to each treatment level and to the control and toxic reference chemical. For each test, the following treatments and control(s) will be used. For each chemical five increasing test concentrations (each containing a minimum 12 larvae X 3 colonies = 36 larvae minimum per treatment) will be used.

The treatment will be given to 2 day old larvae and the data will be recorded on the survivability of the brood on Day 3 after treatment followed by on Day 8, Day 15 Day 21(emergence day). The number of emerged bees and non-emerged bees (pupal mortality) will be counted on Day 21. Brood survival rate and emergence rate will be calculated in percentage by comparing the number of bees emerged on Day 21 to the number of larvae on Day 2 when dosing starts. Simultaneously data will be recorded on control colonies.

Semi field tests on larval development of honey bees

Semi-field tests involving cages, tunnels or tents, will be used. The cage will be having minimum area of 40 m². Cages having a surface of 8x5 m² and approximately 2.5 m high will be erected in a field. On top of a black water permeable cloth, the floor of the cage will be lined with white water-permeable synthetic foil to facilitate recovery of dead honeybees. Small healthy queen-right colony per cage containing approximately 3000-5000 bees and at least three full frames containing all brood stages will be used. Honeybee hives will be placed on poles at approximately 1.5 m high. The high position of the hive made the orientation of the honeybees easier. Inside the cages the plants will be connected to a drip irrigation system, so that watering of the plants occurred with minimal bee disturbance and without wetting the residue.

The test chemicals will be applied during the daytime when bees are foraging most actively.

Data on larval development of honeybees will be recorded as per the methodology for the laboratory tests.

Tests on the impact of contaminated pollen/nectar on honey bees prior to high tier testing.

For nectar collection each *Apis mellifera* L. forager will be observed in the treated area. The foragers will be collected with the insect collecting net and taken out of the net carefully avoiding any pressure on its abdomen. **The bees will be frozen and honey stomach content will be withdrawn..** The oozed out nectar, around mouth parts, will be sucked up in lambda capillary tube and will be discharged into the vial.

For pollen collection, the bees will be caught carefully from the head and portion of the thorax in between two fingers. The pollens foraged will be removed with the help of a hair brush (no. 1) in vial. In each sample 20 foragers will be taken. Similarly, samples will be collected for other intervals starting from 0 h after spray (just after spray), 24 and 48h of spray. The collected samples will be stored in deep freezer at -4°C temperature till extraction and clean up.

The collected samples of nectar and pollen will be for residue analysis.

Tunnel test on honey bees

Tunnel test comprised as a part of semi-field studies. The crop area covered by each tunnel tent will be at least 40 m² with one bee hive placed in each tunnel. For the present study, the honey bees will be exposed to the treated crop and checked under comparable conditions for the different treatment groups. As standard, bee flight, bee mortality and the condition of the colonies will be assessed. All tunnels will have the same orientation for common disposal. The tunnel nets will be stretched out and embedded alongside the tunnel, thus creating a closed environment limiting foragers' flights. Mustard crop will be grown under tunnels.

Twenty four semi-field tunnels will be erected:

- One tunnel for each replication/ pesticide to be tested. For six chemicals 18 semi-field tunnels will be erected (3 replicates each)

- Three semi-field tunnels for control

- Three semi-field tunnels for reference chemical

The tested pesticide will be administered after the bees get conditioned to the crop on the onset of bloom. The hives will be placed in the central part of the tunnel.

Observations

- Mortality and behaviour will be recorded at least 2 days prior to treatment and after treatment on days 0, 1,2,3,5 and 7. Foraging activity will be assessed by monitoring number of bees/m² of treated crop. The behaviour of the bees on the crop and around the hive will be recorded. Dead bee traps and those dying in rest of the cage (on water permeable sheets placed along paths or edges of crops) will be counted.
- The condition of the test colonies (brood, pollen and nectar area) will be recorded just before moving the colonies in to the cages, shortly before application of pesticide and after exposure on different days.

DETAILS OF PROTOCOLS TO BE ADOPTED

A) TOXICITY STUDIES (To be conducted by PAU Ludhiana And Division of Entomology IARI, New Delhi):

- 1. Objective** : To test the toxicity of various neonicotinoids and a standard reference insecticide against honey bees
- 2. Test Insect** : *Apis mellifera* (workers)
- 3. Treatment details** : Serial concentrations of various neonicotinoids on cotton mustard and citrus to be tested (Reference – Laurino *et.al*, 2011 *Bulletin of Insectology* 64 (1) : 107-113).e.g **OPPTS guidelines 850.3030**

A. COTTON

1. Test method : Indirect contact Toxicity (ICT)

Leaves are to be sprayed to drip with pure water (Control) or with water suspensions of the insecticides to be tested. They are allowed to dry in the shade for at least three hrs. After that, honey bees (10 bees/cage) are allowed to walk freely on the cage bottom covered with leaves for 3 hrs. For each replication 2 or 3 cages are to be used and replicate the test 2 or 3 times. Discard the replication with control mortality >10%. Honey bees are considered dead when they remain totally motionless during a 10 seconds observation period. Remove the leaves and honey bees are allowed to feed on sugar candy throughout the trial and Note down the mortalities after 3 hrs, 6hrs, 12 hrs, 24hrs & 72 hrs. The log concentration – mortality regression will be estimated by probit analysis using the MSTAT Program based on calculations given by finney (1971)

FIELD TRIAL PROTOCOL (For Residue / Dissipation study)

- 1. Objective :** To evaluate the residues and persistence (Dissipation) of Neonicotinoids and a standard reference insecticide in Mustard.
- 2. Crop :** Mustard

3. Treatment details :

Sr. No.	Treatments	Dosage (g / ha)	Dosage of formulation / ha
1.	Thiamethoxam 25 WG	T ₁ 12.5-25 T ₂ 25-50	T ₁ 50-100 T ₂ 100-200

4. Design : RBD
 5. Replications : 3
 6. Spray schedule : Mustard : Single spray in January at 50% flowering of the crop
 7. Spray Volume : 500 litres / ha.
 8. Residue Analysis : Residues of neonicotinoids from the above mentioned treatment to be determined in the leaves at 1,3,7, days after spray or till the residues reaches BDL (0.01 mg/kg) as per standardized methodology. In case of flowers, samples are to be collected at 50 % flowering stage of the crop. Analysis will be done by HPLC and LCMS.

FIELD TRIAL PROTOCOL (For Residue / Dissipation study)

1. Objective : To evaluate the residues and persistence (Dissipation) of neonicotinoids and a standard reference insecticide in Citrus.

5. Replications : 3
6. Spray schedule : Cotton : Single spray after 65-70 days after sowing
7. Spray Volume : 500 litres / ha.
8. Residue Analysis : Residues of neonicotinoids from the above mentioned treatments to be determined in leaves at 1,3 and 7 days after spray or till the residues reaches BDL (0.01 mg/kg) as per standardized methodology. In case of flowers, samples are to be collected at 50 % flowering stage of the crop. Analysis will be done by HPLC and LCMS.

B) SEMIFIELD TESTS (To be conducted by AICRP Centres):

Title: Evaluation of Impact of Neonicotinoids to the Honeybee *Apis mellifera L.* and *Apis cerana* under semi-field conditions (tunnel test)

Objective

The objective of this study is to determine the impact of Neonicotinoids in a realistic application scenario on the honeybees *Apis mellifera L.*, *Apis cerana*, Bumble bees and Stingless bees under semi-field condition (tunnel test) following the guideline European and Mediterranean Plant Protection Organization – No. 170 (2010).

Principle

To evaluate mortality, flight activity, foraging activity, colony strength and behavior of small healthy honeybee and other pollinators colonies after being confined in a tunnel to foraging on a crop treated according to a pre-flowering GAP,

Design and layout of the Test

One test item treatment as per label recommendation, one toxic reference and one water control treatment, each with three replicate tunnels and one bee colony per tunnel.

Details of bee colonies

Small healthy bee colonies procured from local bee keepers, disease free with no history of medical treatment within the last four weeks are selected. The size of the colony will be chosen based on available crop area per tunnel. For a tunnel of minimum 40 m², each colony should consist of the equivalent of approximately 3 full frames of brood cells in all stages, 1-2 food comb with honey and pollen and approximately 3000-5000 worker bees. All hives will be equipped with a dead bee trap at the entrance. The colony should be prepared as a “split” with young workers shortly (2-3 days) before placing in the tunnels to minimize the number of established foragers and placed in the tunnels at the start of flowering when there is sufficient attractive crop. Soon after introduction into the tunnels any established foragers will fly into the mesh sides of the tunnels and result in large numbers of dead foragers over the first few days after introduction which is unrelated to treatment. Colonies should be prepared at least 3-5 km from the test site to ensure re-orientation. During the whole testing, colony will be supplied with water. Colonies will be exposed in the tunnel for a period of at least 14 days, or as long as the flowering condition of the crop allows and then removed to a site where no pesticide exposure will occur, where all colonies will be set up together in one location. The colonies are required to be established as per flowering pattern of crops.

Test Conditions

Tunnels as per international guidelines suitable under Indian conditions and crop specificity are proposed for the purpose of experimentation and stabilization of different honey bee species. The covering gauze will have a maximal mesh size of 3mm. The test crops will be mustard, cotton and citrus.

Test Product

The test product and toxic reference will be prepared freshly (within 2 hrs of application) according to the GAP, in water and stored cool before use.

Application of test item

The application for the toxic reference and the control will be performed a few days after the bee colonies have been set up in the tunnel, when the relocation-related background mortality after the

transfer has ceased. Treatment of toxic standard and water control will be done during full bee flight (normally late morning). The application rate for each treatment will be recorded based on nozzle output rate and time for application. Application will be made to the tunnels in the order, control and then test product. The toxic reference will be applied at flowering.

During of the study

The assessment of the number of dead bees will be carried out approximately at the same time of a day in the morning. Flight activity assessment will be done during times of high flight activity of the bees. The total observation period of the colony development will be for at least 28 days.

Recording of Meteorological data

During the whole testing, data on temperature, relative humidity and rainfall will be collected on daily basis and wind speed will be recorded during application inside the tunnel.

Mortality of honeybees

It will be assessed daily on linen sheets spread out in front of the hive and along central paths running the length and across the tunnel. Additionally, dead bees present in the traps will be counted. Assessment will done daily

The number of dead bees should be recorded separately as adult worker bees, larvae, pupae and drones (males).

Mortality assessments in dead bee traps will be conducted throughout the whole studies; all other mortality assessments only as long as the hives are set up in the tunnels.

Flight activity

Flight activity will be recorded 3 times each day (at peak foraging times, e.g. morning, early afternoon, late afternoon) in a 1 m wide transect along the length of each side of the tunnel for the 14 days the colonies are within the tunnels. This will also depend upon the crop under study. At each assessment time the number of bees that are both foraging on flowering plants and flying around the crop will be counted during walking along the transect in a set time period. e.g. 2 mins per transect. Flight activity assessment will be conducted as long as the colonies are set up in the tunnels.

Condition of the colonies

The condition of the colonies will be assessed on the day before introduction into the tunnels and on days 7 (± 1 day), 14 (± 1 days), 21 (± 1 day) and 28 (± 1 day) (the last 2 assessment whilst the colonies are at the monitoring site)

In order to record effects of the test item, the following parameters will be assessed:

- Strength of the colony (number of combs covered with bees),
- Presence of a healthy queen,
- Comb area with pollen and nectar (in sq. inch),
- Comb areas containing eggs, larvae and capped cells (square inches)

The estimation of the areas containing brood and food will be done in square inches each side of each frame containing, pollen, nectar/honey, eggs, larvae, capped cell or are empty. This needs to be done by a person (preferentially a beekeeper or bee researcher) experienced and trained with this specific method.

Brood and colony condition assessments will be done throughout the whole study.

Evaluation of the test results

The evaluation of the results will be done by comparing the results using appropriate statistical tools in the test item treatment to the water treated control and treatment and furthermore by comparing the pre and post application data regarding

- Mortality in the dead bee traps and on the linen sheets (number of dead adult worker bees, pupae and larvae)
- Flight activity in the crop
- Condition of the colonies
- Strength of the colonies
- Brood development
- Average brood area per hive

C) FIELD TESTS (To be conducted by AICRP Centres):

Title: Evaluation of potential effects of application of Neonicotinoids to the honey bee *Apis mellifera* L. and *Apis cerana* under field conditions.

The following study is designed to determine the effects of spray application of [active ingredient] as the formulation X applied to crop on honey bee (*Apis mellifera* L.) colonies in the field when applied according to the GAP/label. During the exposure phase, the honeybee colonies will be monitored at the fields with assessment for immediate post-exposure effects (mortality and behaviour). The study will be conducted as field study (open field) under local practical conditions in a representative crop-growing area. This study will be conducted in accordance with the guidelines of the European and Mediterranean Plant Protection Organization No. 170 (3) (OEPP/EPPO, 2010).

The exposure phase will be carried out using two experimental groups; one group comprised three plots each with 6 honeybee colonies exposed to active substance treated crop. The other group comprised three plots each with 6 honeybee colonies exposed to untreated (control) crop. **The field studies will be conducted for the molecules showing relevance of concern.**

Application

The test product and toxic reference will be prepared freshly (if practically feasible within 2 hrs before application) according to the GAP, in water and stored cool before use. The application will be made with calibrated equipment and the applied rate will be determined measured by determining the volume of the test item before and after application with an application tolerance of $\pm 10\%$.

Test Location and Design

The study will be conducted at eight AICRP centres. There will be six different plots of 1-2 ha, three of which as control and three as treatment replicates. The six different sites will be separated by a least 2-3 km from each other to avoid bee foraging on the other plots where the same crop as used in the study is grown. Moreover, the study fields will be located away from other crops in flower and significant areas of weeds. The pesticide use history of all fields used in this study will be documented for at least the two previous cropping seasons before the start of study.

Agronomic records for the plots and their environment (including the presence of any weeds around the test plots and location of other crops) and meteorological data for the experimental period will be recorded.

Dosing

The test product will be applied in a use scenario according to the label recommendations and Good Agricultural Practice.

Data Collection

Raw data will be collected in pre-approved formats during the entire study.

Honey bees effects assessments

All effects assessments will take place on the test plots or as long as the crop is still in bloom. Hives are to be kept at test plots, and the colonies will be assessed for a further 28 days after moving them altogether to an untreated area where no pesticide exposure is likely.

Test Bee Hives

Six normally developed queen-right bee colonies will be used per treatment and control i.e. a total of 72 colonies. The colonies will be as similar to one another as possible. The hives will contain 8-9 frames including at least 10,000 bees, 3-4 frames of brood and 2 frames of stores.

The colonies will be moved to the test sites at the onset of bloom of the crop. The hives will be placed on the field edge such that bees will fly over the plot. If necessary, colonies will be supplied with water throughout the test.

Exposure and Monitoring phase

On day after the setup of the hives, the activity of the bees at the hive will be assessed from sunrise to sunset to determine when the bees are actively foraging. This will be assessed by counting the number of bees leaving the hives for 30 seconds at half an hour intervals until activity had started (at least 1 bee/ 30secs/ 2hives) and then once per hour.

These data will be used to identify the most appropriate times for subsequent assessment of bee activity at the hive and in the crop.

Subsequent assessments will be aimed at collecting bee activity and behaviour observations 3 times each day but the exact timing will be determined by suitable weather (e.g. assessments will not be made during periods of rainfall).

If practically feasible, all following assessments should be done simultaneously or at least within a as short as possible time frame for all replicates, in order to make sure that environment conditions during the individual assessments are well comparable.

Mortality in Front of the Bee Hives and in the Field

When the hives are set up at the test plots, dead bee traps will be fitted to each hive and water-permeable sheets of 1.5 m width and about 3 m length spread out in front of the hives.

At three places within the crop water permeable sheets (each area: approximately 15 m²) will be placed between the rows of the crop on which any dead bees found will be counted. Each day the number of dead bees will be recorded (the bees in the dead bee trap and on the sheets in front of the hives were combined).

Assessments of number of dead bees will be made daily until the end of the exposure period. In the first days after set up of the hives at the test plots, increased mortality figures are to be expected in both treatments and control colonies, caused by the transport and relocation stress to which the bee colonies were exposed before. This can be differentiated from potential treatment-related mortality by comparison with the control colonies.

Activity and Behaviour of the Bees in the Field

Bee activity and behaviour will be recorded at the hive and in the field each day from the setup of the bee hives in the field. Activity at the hive will be assessed by counting the number of bees leaving the hive for 30 seconds three times per day (timing based on the assessments on the day before spray application).

The observations in the field will be undertaken by walking along the rows for a total of 10-30 minutes per plot (depending on the attractiveness of the crop (highly attractive crop 10 mins, less attractive crop 30 mins) three times per day (timing based on the initial activity assessment at the hive. Each transect will be at different areas of the plots. The numbers and behaviour of the foraging bees on and number of bees flying over the transect will be recorded. Assessments of activity at the hive and in the field will be made 3 times on each day until the end of the exposure period at the test plots.

Colony Condition and Development of the Brood

The condition of all colonies will be recorded and the development of the bee brood checked 2±2 days before setup of the colonies at the test fields, every 7±1 days until the end of the entire study exposure period (i.e. until the end of the additional 28 day additional observation period when the hives have been removed from the test fields).

The following parameters were assessed:

- Weight of each colony
- Strength of the colony (number of combs covered with bees and % area of each combs covered with bees)
- Presence of a healthy queen (presence of eggs, presence of queen cells)
- Visual assessment of the pollen storage area and area with nectar (square inch)
- Visual assessment of the area containing eggs, larvae and capped cells (square inch)

The measurements will be done for all combs per hive. Afterwards the mean values were calculated for each hive and assessment date. These assessments need to be done by and experienced and specifically trained person, preferentially a bee keeper or bee scientist. One and the same person should do the estimates for all study hives.

Visual inspections of the colonies were undertaken for signs of bee disease (*Nosema apis*, *Acarapsis woodi*, viruses, European foulbrood, as well as any other locally relevant diseases) at each assessment. *Varroa* assessments were undertaken by placing a sticky sheet on the floor of each colony and counting the *Varroa* mite fall. The sheets were replaced with clean sticky sheets at the time of colony inspections outlined above and counted after return to the laboratory.

D) RESIDUE STUDIES (To be conducted by Division of Agro. Chemicals, IARI, New Delhi):

Experiments to be conducted (i) under controlled conditions in tunnel (ii) under field conditions
The treatments would be according to the recommended uses of neonicotinoids. The recommended uses of neonicotinoid formulations in cotton, mustard and citrus are as follows.

Crop	Pesticide	Formulation	Dose	Pests controlled
Cotton	Acetamaprid	20% SP	10 g ai, 500-600 L per ha	Aphids, Jassids Whiteflies
		Clothianidin	50% WDG	15-20 g ai, 500L per ha
	Dinotefuran	20% SG	30-40 g ai, 500L per ha	White Fly, Jassids, Aphids &Thrips
	Imidacloprid	70% WG	10 g ai, 500-600 L per ha	Jassids, Aphids, Thrips
		48% FS	300 – 540 g aiper 100kg seed	Aphids, Whitefly, Jassids, Thrips
		70% WS	350 – 700g ai per 100kg seed	Aphids, Jassids, Whitefly, Thrips,
		30.5% M/M SC	21-26.25 g ai, 500 – 750L per ha	Aphid, JassidThrips

	Thiamethoxam	25% WG	25g ai, 1000 L per ha	Psylla

- Doses will be as per approved label claims and only for registered molecules.

Sample Collection for residue studies:

Folliar sprayed pesticides

Materials to be sampled : leaves, flowers, nectar and pollen

Sampling intervals : 24 hours, 3 days, 7 days, 15 days, 30 days, 45 days after application depending on the flowering period of the crop.

Seed treatment with neonicotinoids in mustard and cotton

Materials to be sampled : leaves/plant, flowers, nectar and pollen

Sampling intervals: 15 days after application (only plant), at initiation of flowering (0-5%), 50% flowering, 75% flowering depending on the flowering period of the crop.

The collected samples will be properly packed as follows:

1. Plant/flowers : in polythene bags
2. Pollen and nectar : in screw capped vials and then sealed
3. Honey : In glass bottles of appropriate size
4. Wax materials and dead honeybees : Plastic boxes

The containers to be properly tagged giving information about place, crop, treatment and sampling interval.

The containers containing samples to packed in dry ice in a bigger PUF box and sent by courier to Division of Agricultural Chemicals, IARI, New Delhi

Pesticide Residue Analysis

The samples received from different centres will be taken out of the dry ice, allowed to warm up to room temperature. Appropriate quantity of material will be weighed and processed for residue analysis. The materials, that could not be processed, will be stored in a deep freezer.

Samples will be processed and analysed for parent molecule as well as their toxicologically significant metabolites. The methods will be standardised and validated before being used for sample analysis.

The tentative protocols of the methods are given below.

Sample processing

Plant samples : Plant samples will be processed by QuEChERS method. Plant samples (leaves/flower) 100 g will be homogenized in high volume homogenizer. 10 g of representative homogenized plant material will be taken in 50 mL centrifuge tube and 10 mL of acetonitrile, anhydrous Magnesium sulfate and sodium chloride will be added and then subject to rotospin at 50 rpm for 5 minutes. The material will be again homogenized by using a low volume homogenizer at 12,000 rpm for 2 minutes. The contents will be centrifuged at 5000 rpm for 10 minutes at 5^oC. 1 mL aliquot of the supernatant will be taken in a micro centrifuge tube, anhydrous Magnesium sulfate and PSA will be added and vortexed for 2 minutes and centrifuged at 5000 rpm for 5 minutes. 0.5 mL supernatant will be filtered through 0.45µM Simlicity® Filtration system and analysed.

Honey/Necture/Pollen : Sample will be extracted and cleaned up using Solid phase extraction method using suitable using cartridges or modified QuEChERS method.

Wax, dead honey bees – Modified QuEChERS cleanup method : About 20 dead honey bee will be homogenized and around 2.5 g of representative homogenized material will be taken in 50 mL centrifuge tube and processed similar to plant samples.

Estimation

LC-MS-MS instrument will be used for residue analysis. The methods will be standardised for the analysis of acetamiprid, clothianidin, dinotefuran, imidacloprid, thiacloprid and thiamethoxam and their toxic metabolites.

The toxicological information and metabolites included in residue definition is given below:

Pesticide	ADI	LD50 Honeybee	Residue definition (codex)
Acetamiprid	0.07	Acute oral toxicity:LD 50 ~ 14.53 microg./bee	sum of acetamiprid and its desmethyl (IM-2-1)

		LD50 8.85 microg. a.s./bee (EXP 60707 A tested formulation) (acetamiprid 20 %)	metabolite
		Acute contact toxicity: LD50 ~ 8.09 microg./bee (acetamiprid)	
		LD50 9.26 microg. a.s./bee (EXP 60707 A tested formulation) (acetamiprid 20 %)	
Clothianidin	0.1	acute contact basis (LD50 > 0.0439 µg/bee) Acute oral toxicity:LD 50: 0.00379ug/bee	Clothianidin
		Acute contact toxicity: LD50 : 0.0275ug/bee	
Dinotefuran	0.2	Acute oral toxicity:LD 50: 0.023ug/bee Acute contact toxicity: LD50 : 0.047ug/bee	Sum of dinotefuran, 1-methyl-3-(tetrahydro-3furylmethyl) urea (UF) and 1-methyl-3-(tetrahydro-3furylmethyl)guanidiumdihydrogen (DN)
Imidacloprid	0.06	Acute oral toxicity:LD 50: 5 ng/bee Acute contact toxicity: LD50 : 14-24 ng/bee	imidacloprid and its metabolites containing the 6-chloropyridinyl moiety
Thiacloprid	0.01	14.6 LD50 oral = 17.3 µg/bee LD50 contact = 38.8 µg/bee	Thiacloprid
Thiamethoxam	0.08	Acute oral LD50: 0.005 µga.s./bee Acute contact LD50: 0.024 µga.s./bee	sum of thiamethoxam, CGA 265307 and MU3

TOTAL NO. OF APPLICATIONS : 3080

SATISFACTORY: 2987

CLARIFICATION : 21

REJECTED : 72

- a. Incomplete submission of required documents i.e. valid manufacturing license ,valid SSI, list of products manufactured in the last two years. BOD/ Incorporation certificate (in case of Pvt. & Ltd. company).
- b. Incomplete submission of online Form-I and hardcopy of Form-I, i.e wrong name of applicant and authorized person, wrong address of manufacturing site, wrong entry of product in online Form-I and hardcopy, incorrect/unapproved source of import (in case of FI and TI category. In-situ Production in case of ALP.
- c. Submission of application under wrong category.
- d. Other issue related to SSI /Manufacturing license

e. CR already issued/MRL not fixed/ banned product.

f. Non submission of required affidavit/Incorrect/ incomplete affidavit.

Part - II
