On earlier occasion also the RC has rejected application under TI (New Source) as applicant had applied under this category without issuance of registration certificate to the first registrant. Further, the applicant is required to submit very relaxed data under TI (New Source) as compared to TI Original registrant. Therefore, a clarification was sought, as per decision of the RC in its 413th meeting, from the applicants as to why their applications under TI (New Source) category [along with formulation files where technical is to be used of TI (New Source)] may not be rejected as the application has been submitted without issuance of CR to the first registrant. In response, they have informed that instead of rejecting, their files may be considered under TI (New Source) vs FI-WRT or TI (New Source) vs FIM-WRT where technical data is available. In support they have mentioned that TIM files are being considered in parity with FI-WRT or FIM-WRT.</p> <p>The submission made by the applicants were deliberated by the RC and found that at the time when the applicants under TI (New Source) were made, they were fully aware that they are submitting application for a category which can be examined only when the first registrant under TI category is in existence. Further, TI (New Source) vs FI-WRT or TI (New Source) vs FIM-WRT guidelines are not in existence. RC also noted that the deemed registration status has already been settled by the Court in 2013 and the guidelines under TIM vs FI-WRT or FIM-WRT has been formulated as per directives of the court. Therefore, the justification submitted by the applicants are not maintainable. Accordingly, the files are treated as closed.</p>
