Discussions :

The group discussed about the following :

1. Import of technical grade active ingredients from the United States of America (proposed source country) w.r.t procedural differences of registering technical based on minimum purity content in India, while the US label mentions nominal purity (average) percentage.
2. The representations of CLI and other relevant documents of international publications like FAO/WHO guidelines, EPA documents 40 CFR 158.175, Specifications of Pesticides A Training Manual.
3. The difference of purity in active ingredients of the molecules registered with European Union (EU) and US EPA.

Recommendations:

2. The maximum content of toxicologically significant and/or relevant impurities shall be same as US EPA approved limit.
3. The maximum content of impurities that are toxicologically non relevant shall be set as following:
 - a) Max. Concentration of impurity in India = US EPA nominal content + 3*SD.
 - b) for technical material produced using unique technologies, like fermentation etc, the concentration of toxicologically non-relevant impurities shall be as per US EPA nominal + 6*SD to accommodate variability.
4. The applicant shall submit a copy of CSF along with FORM I while submitting the application as mandatory document.
5. Any change in CSF in the source country shall be brought into the knowledge of RC by the applicant by submitting copy of revised CSF for endorsing the revised composition on CR.
