F. No. 21-21/2013- CIR-II  
Government of India  
Ministry of Agriculture  
Department of Agriculture & Cooperation  
Directorate of Plant Protection, Quarantine & Storage  
**Secretariat of Central Insecticides Board & Registration Committee**  
N.H.- IV, Faridabad 121 001

Dated: February 26, 2014

**PUBLIC NOTICE**

The Registration Committee, constituted by the Central Government under Section 5 of the Insecticides Act, 1968, had registered a combination of Streptomycin Sulphate and Tetracycline Hydrochloride as 9:1 % w/w, which implies (90%+10% w/w). However, in some of the certificates, the same appears to be 9%+1% (w/w) along with 90% (w/w) adjuvant. This created an anomaly, which needed clarity and harmonization to avoid confusion. The Registration Committee discussed the issue in 227<sup>th</sup> meeting vide Agenda Item No. 3.3. The relevant portion of the minutes of the said meeting read as under-

**"The Committee deliberated and approved the chemical composition of the combination product in the ratio of 90:10. The Committee also directed that chemical composition in the ratio of 90:10 may be incorporated in the registration certificates granted earlier under Section 9 (4)."**

This decision somehow could not get implemented. Therefore, the Registration Committee in its 342<sup>nd</sup> meeting considered the issue again vide Agenda Item No. 3.1. The relevant portion of minutes of the said meeting read as under:-

**"The Committee reiterated its decision taken in 227<sup>th</sup> Meeting held on 20.10.2002 and directed the Secretariat to issue a Public Notice in this regard on its website."**

In compliance, the decision is hereby notified. All concerned may get their Certificates of Registration corrected accordingly.
